

SpeedCoach XL Coach's Mount

This bracket was designed to secure the XL in a Coach's Launch. The dock can be installed directly onto a flat surface of a launch, or can be used with an optional "T" or "A" Bracket.

During installation, it may be helpful to click the XL onto the Mount while selecting a location to ensure that it is out of the way and easy to see. Clean the surface with the included alcohol swab. Remove the backing from the double sided tape and press the dock firmly into place on your launch. The tape requires 24 hours to fully cure.
