

How to change the battery on a SPC GPS Model 2 HR Belt (current NK version belt)

1) Remove the heart rate belt buckle from the rest of the strap. Locate a nickel or quarter to help with door removal.

2) Place the nickel or quarter in the middle slot and press down slightly. Turn a $\frac{1}{4}$ rotation counterclockwise to open.

3) Remove battery and set aside cover. Replace with a new CR2032 battery with + side facing up.

4) Place cover back on. Place nickel or quarter back into center slot. Slightly press down and turn $\frac{1}{4}$ turn clockwise to seal door back onto buckle.

How to change the battery on a SPC GPS Model 2 HR Belt (older NK version belt)

1) Remove the heart rate belt buckle from the rest of the strap. Locate the indentation at the bottom of buckle.

2) Locate a nickel or penny and insert into this indentation so that the coin goes underneath the lip of the battery cover. Press down gently on the edge of the coin to pop open the battery door.

3) Remove the battery cover and then remove the battery. Insert a fresh battery into the same area with label side up. Please note: Battery is a CR2025 model.

4) Gently press down the battery cover until it snaps into place. Please ensure that the red O-ring is still properly aligned as shown to the left.

O-Ring
(keeps it waterproof)
