Turn on amplifier and display. Increase amplifier volume.

Timer and stroke count will turn on in “STOP.” Stroke rate will operate.

Turn off amplifier and display. Decrease amplifier volume.

Ready timer and stroke count.

Bow to start timer and stroke count.

Timer, stroke rate and stroke count will keep running until stopped.

Timer will run to 59.99 then roll back to 0.

Count will roll to 99 then roll back to 0.

Stroke rate will be stored in memory automatically every 10 seconds for approximately 60 minutes.

Store split and rate manually.

Time will freeze so you can read split.

Timer continues internally and displays running after 5 seconds.

“Playback” memory automatically. Timer will run and stored rate will display at each 10-second interval. Rate and cumulative stroke count will display for each manually stored split. Stroke rate information is an instantaneous snapshot, not averaged.

Manual step forward or backward through memory. Time and rate will display for each 10-second interval. Time, rate and cumulative stroke count will display for each manually stored split. Stroke rate information is an instantaneous snapshot, not averaged.

“Playback” memory automatically. Timer will run and stored rate will display at each 10-second interval. Rate and cumulative stroke count will display for each manually stored split. Stroke rate information is an instantaneous snapshot, not averaged.

Exit recall.

Display will show charge percentage and read “Full” when complete.

Error messages.

Battery voltage, temperature, or charging time has exceeded normal limits during charge. Continued charging (more than 3 days) may degrade the life of the battery.

Battery does not float.

If battery pins or contacts become wet, dry thoroughly before use.

Storage.

If stored, charged batteries will hold a minimal charge for 12 months. Keep one on hand to ensure your Cox Box and battery pack in for evaluation.

Specifications.

Control Unit, Bumper, Battery Pack: 1 lb., 3.9 oz. Battery Pack: 3.8 oz.

Battery life (1 hour). Standby: 25 hours. Typical use: 4 hours.

Each bar represents 20% of battery life.

Up to 4 hours for full charge.

Before first use, fully charge battery. Use any standard Cox Box wall or car charger. A fully drained battery requires 9.5 hours of charging to reach full capacity.

Display will show percentage and read “Full” when complete.

Battery management logic protects from overcharging. However, avoid leaving on charge for more than 7 days to preserve life of your battery.

Battery locking ring “CLICK” to ensure it is locked in place.

If battery pins or contacts become wet, dry thoroughly before use.

If stored, charged batteries will hold a minimal charge for 12 months. Keep one on hand to ensure your Cox Box and battery pack in for evaluation.
