» Go to the Logbook app or http://logbook.nksports.com/ to view.

» You should show as connected fairly quickly. Use CoxBox.

» Enter a Boat ID and make sure Streaming is toggled to On.

» Open the NK LiNK Logbook application. Go to the Stream page.

» Make sure Bluetooth is enabled on mobile device and has cellular live. We recommend keeping the phone in a waterproof bag.

» Select Live Stream to broadcast your CoxBox measurements to the cloud for remote viewing. You will need to pair the CoxBox to a mobile device and have the phone in range of CoxBox to broadcast your data live. We recommend keeping the phone in a waterproof bag.

- Download NK LiNK Logbook application to your mobile device.
- Make sure Bluetooth is enabled on mobile device and has cellular coverage.
- Open the NK LiNK Logbook application. Go to the Stream page in the app.
- Enter a Boat ID and make sure Streaming is toggled to On.
- Select Live Streaming option on the CoxBox. Then go to Phone pairing > Find New.
- You should show as connected fairly quickly. Use CoxBox normally to broadcast live.
- Go to the Logbook app or http://logbook.nksports.com/ to view live results.

MEMORY
The total memory that the unit can store is approximately 25 hours. Every stroke is stored in memory and the memory can be reviewed by every 100 meter increment. The speed input (GPS or Impeller) and system of units used will be stored as was rowed.

Memory Storage
When the memory is full, the unit will stop recording data. When hearing or full data, delete all session data to continue recording (see below). The amount of memory used can be found on the bottom of the Recall Menu. An alert message will appear when memory log is nearly full.

Data Recall
Select Data Recall from the Main Menu to review stored data. Recall memory will be formatted in sessions according to date and time. Just Row sessions will have the JustGo prefix whereas a Workout session will just show the pieces run.

Please note: a session is not complete until: a) In Just Row, you reset and time. Just Row sessions will have the JustGo prefix whereas a Workout session will just show the pieces run. b) In Workout, you reset the counter b) in Workout, the workout is completed or cancelled.

Delete All Session Data
This selection will delete ALL memory if chosen. Sessions cannot be deleted individually.

Viewing Sessions
Select a session will bring up the Session Overview (Figure 1). The overview provides the overall distance, time, avg split, and avg stroke rate during that session. Selecting the Session Overview will bring up the Session Details (Figure 2). This page will show the session breakdown by specified period (time or distance). Select MORE to view additional measurement values not currently shown on the screen.

DATA LINK
Select this option to connect the CoxBox to a mobile device to upload session data (‘GPS only’).

- On your mobile device, download Link Logbook from the app store https://nksports.com/link-logbook
- On your mobile device, turn Bluetooth on. Open NK LiNK Logbook and login to your account.
- In the app go to the Workout Log Screen. Press the arrow/cloud icon in the top right of the screen.
- On the CoxBox GPS, go to the Main Menu and select Data LiNK mode.
- In the Logbook app, your CoxBox should appear, select it to begin uploading data.
- After data has uploaded, select the calendar date and session you want to review.
ADVANCED SETUP MENU

Impeller Calibration
To change your Calibration value on the unit will not Auto Pause during the Rest sessions of a Workout.

Noise Filtering
Governs the degree of acceleration that must be detected to start the stroke meter. The default value is 3. If you increase this value, more acceleration is needed to register a stroke. If you decrease this value, less acceleration is needed to register a stroke.

Axis
Allows you to select Front-Back-2 (2) or Asymmetrical (3). Front-Back is generally recommended for rowing assuming that the unit will be mounted perpendicular to the long axis of the boat. If mounting at a non-perpendicular axis, the recommendation is to toggle to Asymmetrical (Asymmetrical)

Time and Date
Used to change the format of the date and time displayed. Please note: only time shows current time, date will be shown on recall screen.

Diagnistics
The Diagnistics screen provides information about the performance of your unit's GPS receiver, acceler- ommeter, HRM, clock, and charging system. This information assists NK tech support in troubleshooting your unit and in case it is not functioning correctly.

Factory Restore
This will reset the firmware back to the default settings. This will also erase all data sessions but will not reset odometer values.

SPECIFICATIONS

Display Type
High contrast, sunlight readable monochrome LCD with 400x240 resolution

Display Size
3.20” tall x 4.4” diameter. Retrofits in current mounting cup.

Battery Life
10 hours, fully-charged

Battery Life Expectancy
2 - 5 years, factory replaceable

Charging Time
Standard Charging – 8.5 hours. Espresso™ Charging – 3.5 hours.

Dimensions
3.20” tall x 4.4” diameter. Recessed in current mounting cup.

Weight
1lb 6 oz

Waterproof
Waterproof to IP67, NEMA-6

Buoyancy
Floats

Measurements
Audio, Wireless Stroke Rate, Elapsed Time, Speed*, Memory*, Splits*, Distance per Stroke*, Instantaneous Split/Speed*

Accuracy
Speed +/− 0.1 m/s, Distance +/− 2.5m over any distance

Environmental
RoHS compliant and marked in accordance with the WEEE directive. Please do not dispose of CoxBox in your household trash. Return to NK, an NK dealer, or a designated recycling center for proper disposal.

WARNING: This product and/or its included or branded accessories can expose you to chemicals, including lead, lead compounds and phthalate DEHP, which are known to the State of California to cause cancer and lead and lead compounds, bisphenol A (BPA) and phthalate DiNP, which are known to cause both birth defects or other reproductive harm. For more information, go to www.P65Warning.ca.gov and www.NKSports.com/prod65.

WARNING! LITHIUM-ION POLY BATTERY HAZARDS

Your CoxBox is equipped with a safety feature that will shut down charging if the battery is too hot or too cold. Do not charge below 32°F / 0°C or above 115°F / 46°C. It contains a lithium-ion poly battery pack.

Lithium-ion batteries contain flammable liquid electrolyte that may vent, ignite and produce sparks when subjected to high temperatures or when damaged or overloaded. If ignited, batteries may burn rapidly with a flash fire and may produce irritating, corrosive and/or toxic gases, including toxic hydrogen chloride gas, which may cause dehydration or suffocation. Contact with battery electrolyte may be irritating to skin, eyes and mucous membranes.

- Do not ever subject to fire or temperatures above 140°F / 60°C. NOTE: A car in hot sunlight may exceed these temperatures!
- Do not charge, use, transport or store above 115°F / 45°C.
- Do not charge below 32°F / 0°C.
- Do not puncture or open the unit.
- If the unit’s internal battery pack is damaged, avoid contact with battery electrolyte, which may be irritating to skin, eyes and mucous membranes.
- In case of battery fire, evacuate the area to avoid inhalation of fumes. If possible, cover the battery with sand to extinguish the fire or use a dry ABC-type extinguisher.
